

**PC**

PrimCoat India

# HP Cera

# HP Cera

Due to the high adhesion to the substrate, HP Cera coating allows longer tool life.

## ■ Components

**HP Cera** was developed for wear protection, low coefficient of friction and excellent sliding properties. It is the best option for applications with low or dry lubrication. Typical applications are engine and machine components, as well as moving mold & die parts.

## ■ Cutting Tools

**HP Cera** is excellent for machining Aluminum Alloys and Non-Ferrous Materials due to its low coefficient of friction!

## Surface Roughness

The combination of low roughness, high resistance to abrasion, and heat tolerance allows a longer tool life.

## Surface Finishing

| Composition | Color     | Structure  | Hardness (GPa) | Thickness (µm) | Oxidation Temperature (°C) | Coefficient of Friction | Surface Roughness (Ra) | Properties   | Application  |
|-------------|-----------|------------|----------------|----------------|----------------------------|-------------------------|------------------------|--|--|
| Cr Based    | Dark Grey | Multilayer | 30 GPa         | 2.5 ~ 3.5 µm   | 550°C                      | 0.1                     | 0.04 ~ 0.10            | High toughness, low friction coefficient and friction wear resistance, excellent sliding properties. | Machining of aluminum alloys and non ferrous materials. Plastic injection. |

Available in Low Temperature, for more information, please contact our sales department.
